

ORGANICS

SITE VISIT & LIVE DEMOS

Site visit to **BERKSWELL COMPOSTING** the day after the **ORGANICS 2020** event. But as this is our 25th Anniversary this is no ordinary site visit, it's also a machinery demonstration event. And, it's free to attend so make sure you book your place. **SIGN UP OVERLEAF**

Machinery demonstrations are regarded as a key tool for selling equipment so we're hoping that there will be a superb turnout to view the kit and chat to the suppliers. For the suppliers, demonstrating is the best method of selling equipment as the end-user is offered a first-hand demonstration of the ability of the machine. For buyers, the element of demonstration offers them something more, as the insight they gain from a demonstration is far beyond the reach of most sellers outside of a demonstration site.

Having brought the industry together for the conference and dinner, what better way to clear your head before you head home than to see and hear about what's on the market. There will be some exhibition stands plus three live demo areas and, as it's a working site we're on, there will be a display screen in the marquee area so we're not too up-close and personal with the machinery.

We hope you're excited about this great opportunity to come together and talk about what the needs of the market are. And you, the buyers, get to witness new technologies and new developments that otherwise you might just read about. Live demonstrations are the best way to make a decision on new purchases. You'll be talking to experts, so you'll get all the information you need while watching the machine in action.

As someone once said, "You see it, you like it, you make a deal!"

Already booked so show you their kit are Warwick Ward Machinery, Hitachi, Global, CRJ and Toyota with more to come. Email to say you're coming events@r-e-a.net
