## PROGRAMME OUTLINE (Updated: 02/02/23)

### Session 1 – Forthcoming Policy developments

Session looking at what policy changes are likely to affect the organics recycling industry with a focus on the mandatory food and garden waste collections and what the impact these changes will have on the ground.

Invited speakers will include:

- Government Minister
- Defra policy team
- Environment Agency
- Sector specialist

### Session 2 – Practical on-site operations

This session will focus on some practical presentations for on-site operations.

Topics will include:

- Health and Safety
- Bioaerosols
- Skills and training
- BAT compliance

### Session 3 – How organics recycling can meet net zero

Session looking at some of the latest developments around meeting net zero. Looking at what practical steps can be taken to decarbonise our industry.

Topics will include:

- Farm of the Future: Journey to Net Zero
- Future of machinery – hydrogen?
- Reducing on site energy consumption

### Session 4 – Soils and carbon benefits

This session will look at the benefits to soils of the addition of organics including the impact on carbon.

Topics will include:

- Voluntary carbon markets
- Role of compost and digestate in soil accreditation
- How compost and digestate can be accounted for under the GHG protocol
