

Biomass Heating & Air Quality Modelling

Dr Oisín de Priall - Reheat

- New installations are requiring evidence of air quality impacts from biomass boilers
- Significant effort and delays to viable projects
- Impact on nature as well as people

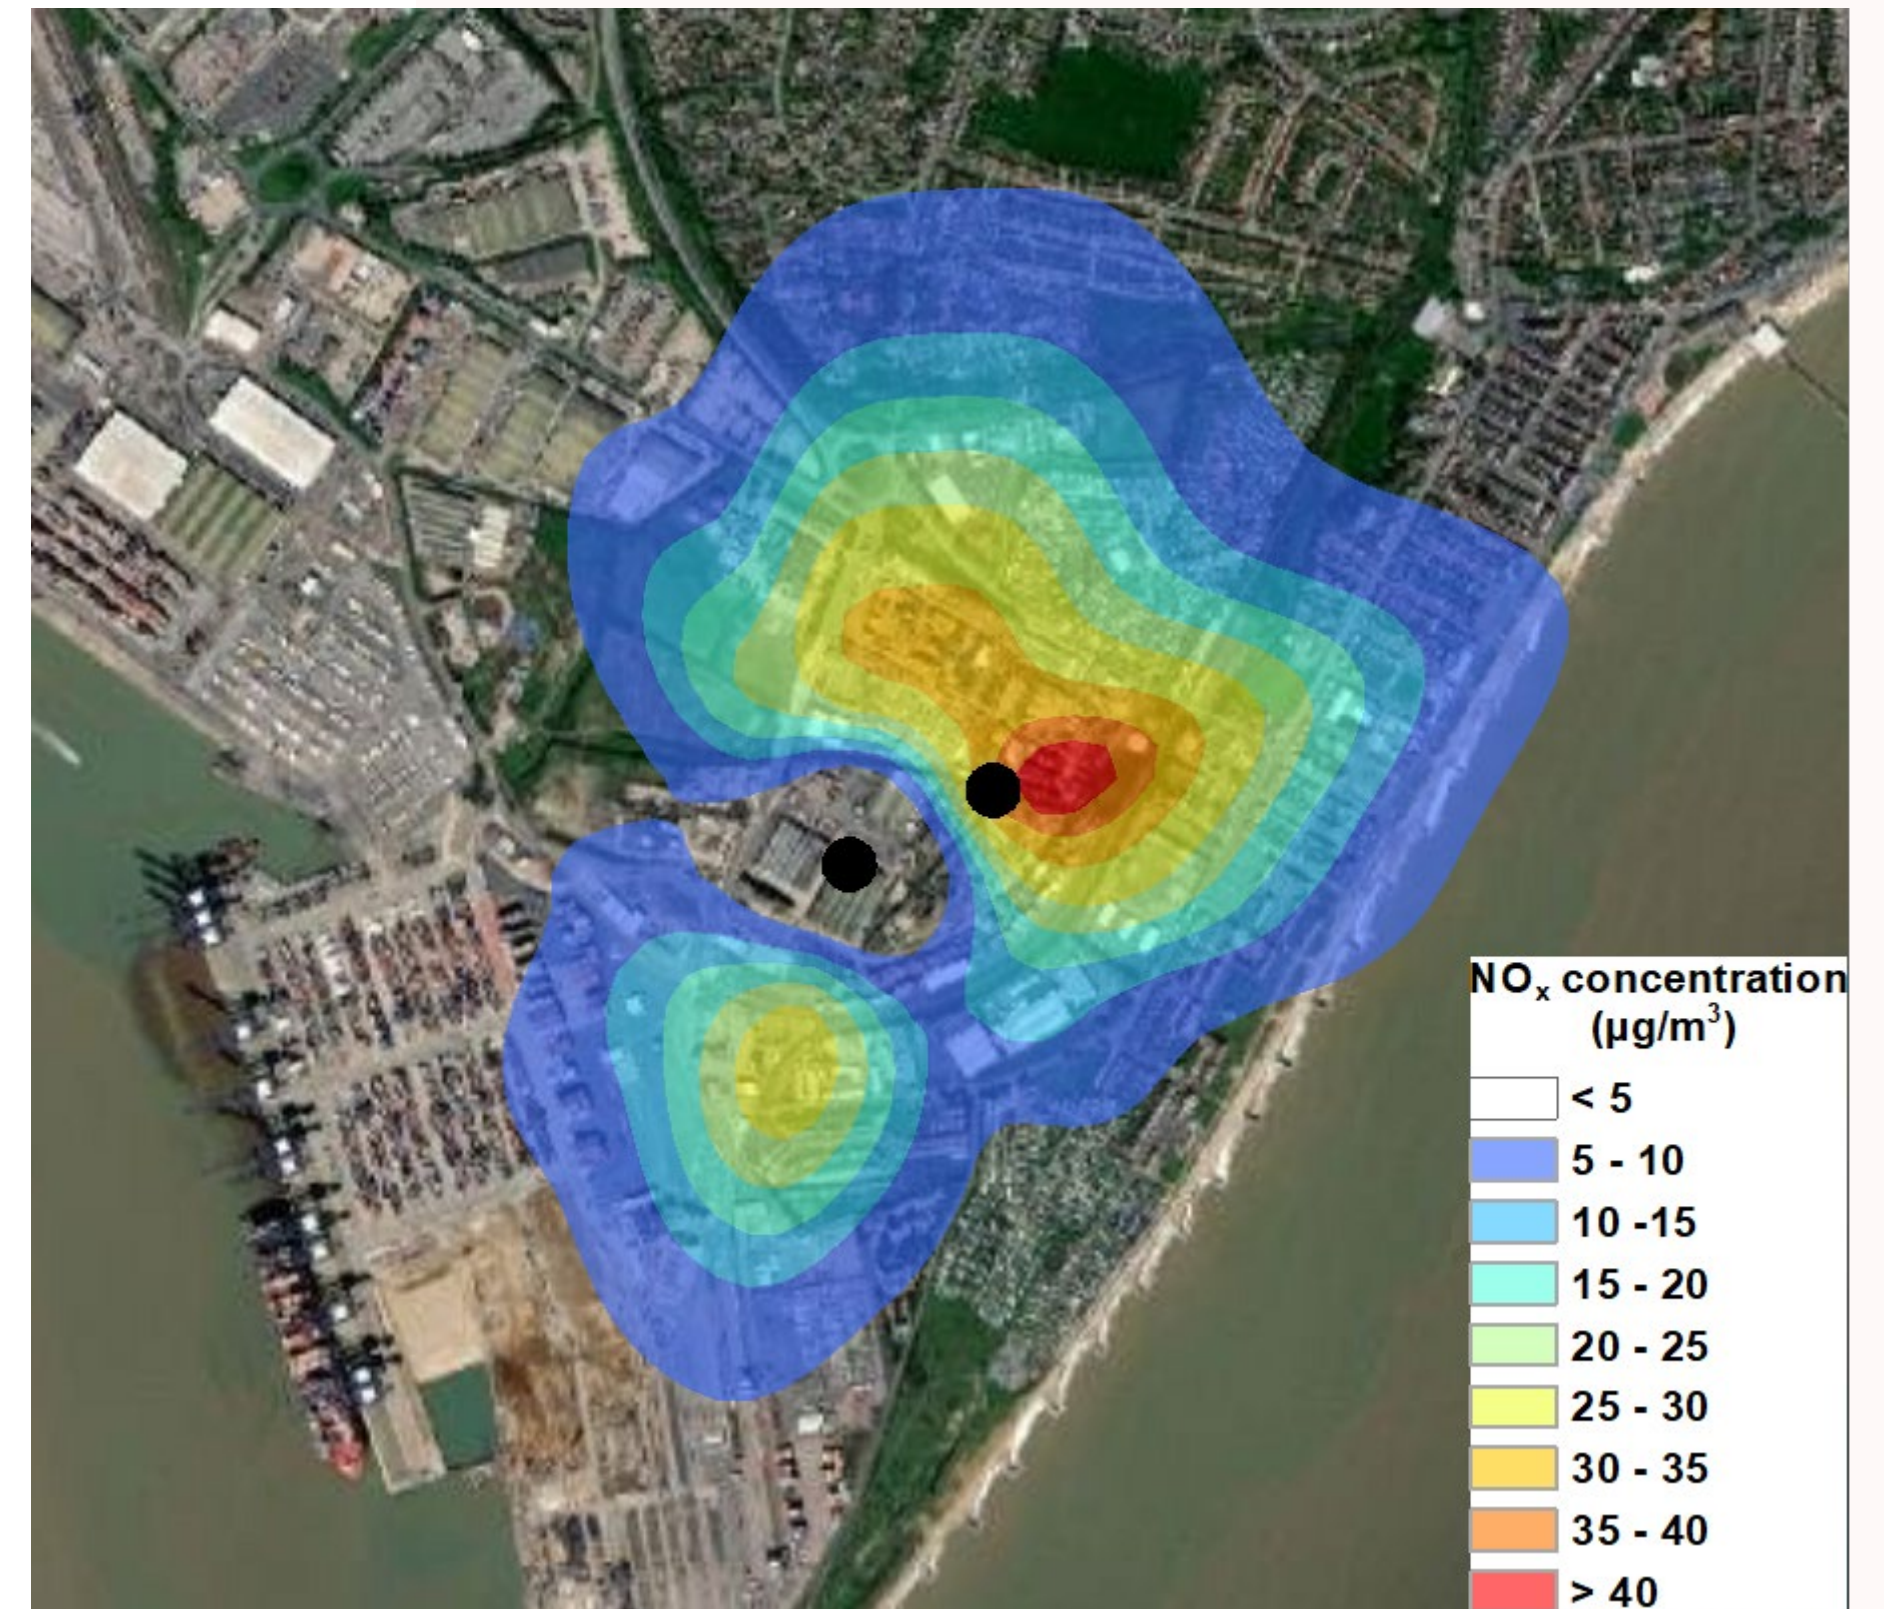

Examples include:

- 2 x 180kW ETA pellet boilers in Ellesmere Port
- 2 x 200kW ETA eHacks in rural Northumberland

- Advanced dispersion modelling for industrial air pollution
- Myth busting of biomass negative impacts
- Data based evidence approach
- Trusted by: EA, SEPA, NIEA, Natural Resources Wales, HSE and more
